

Breach Prevention & Productivity

A COMPREHENSIVE & CONTINUOUS CYBERSECURITY SOLUTION

What's Included:

Annual Cybersecurity Training

Set the foundation each year with an overview and assessment of the most important cybersecurity practices.

Ongoing Nanos[®] & the Newsfeed

Nanos[®] are ultra-compact—less than 60-second—tips, tricks, and shortcuts for mastering Microsoft 365 products effortlessly. Available exclusively in the BSN Newsfeed.

Dark Web Monitoring

Proactively monitor the dark web for compromised account data for up to three company domains. Users can scan the dark web for personal accounts too!

Employee Vulnerability Assessment (EVA)

EVA identifies human vulnerabilities and related risks. As a visual dashboard, we combine security metrics with quantitative analysis to promote friendly competition. Monitor your ESS here.

Baseline Employee Cybersecurity Assessment (BECA)

A baseline first test for your employees. Gauge their cybersecurity knowledge across 6 topics including phishing awareness, handling PII, social media, and working remotely.

Weekly Micro Training

2-4 minute video trainings sent weekly with multiple choice quiz questions to keep users continuously training while enhancing their Employee Secure Score (ESS).

Microsoft 365 & Google Cybersecurity Training

Explore common cybersecurity threats impacting Microsoft 365 products & Google products in these comprehensive courses—in under 20 minutes.

Phishing Simulations

Routine simulated phishing has been proven to minimize the risk of end-users falling victim to a malicious phishing attempt.

Monthly Newsletters

Monthly security newsletters that keep users up to date with the latest in cybersecurity.

Annual Security Risk Assessment

Based on NIST standards, our SRA assesses your administrative, physical, and technical vulnerabilities; identifies the risks and provides recommendations for improvement.

Security Policies & Procedures

Policies and procedures are key to establishing expectations. Our document management portal contains a variety of customizable security policies.

Microsoft 365 Fundamentals Training

15-20 minute courses that provide a comprehensive introduction to core Microsoft 365 products, offering a thorough overview of fundamental functionalities along with tips and tricks to boost efficiency.

PII Protect Portal Teams App

Easy access to the PII Protect Dashboard and Newsfeed within the Teams app, streamlining training completion and providing timely notifications to ensure employees stay informed and empowered.

Catch Phish Outlook Plug-in

Outlook add-in that analyzes emails for unknown senders, malicious links, unexpected attachments, and strange messaging at the click of a button. No more waiting for IT to confirm suspicions.

Pre-Employment Assessment

Assess the cybersecurity knowledge of potential employees to learn what areas of training to focus on first.

pivotalIT[®]
Strategy. Solutions. Support.
