

Managed Endpoint Detection and Response (EDR)

Huntress Managed EDR brings the tech *and* the experts to find and stop attackers in their tracks.

Basic endpoint defenses aren't enough and top-tier endpoint security shouldn't be reserved for the largest enterprises with big budgets. Huntress Managed EDR levels the playing field with a solution built and priced for *all* businesses.

Huntress combines enterprise-grade tech, elite threat experts, threat hunting, and a 24/7 AI-assisted SOC with seasoned analysts. We focus on cutting through the noise to surface real threats, not false positives. And if hackers find a gap, we're on it day and night – detecting, disrupting, containing, and eliminating the threat before damage is caused. Hackers get wrecked, you get peace-of-mind.

Key Benefits

Modern EDR

When attacks happen, you'll be protected. Our **purpose-built EDR** for Windows, macOS, and Linux surfaces real threats to enable our SOC to stop attacks fast.

Our team is your team

Huntress' **team of industry-recognized threat experts** uncovers adversary activities and tradecraft that powers our EDR solution. That means you only see high-confidence, validated threats with **<1% false positives**.

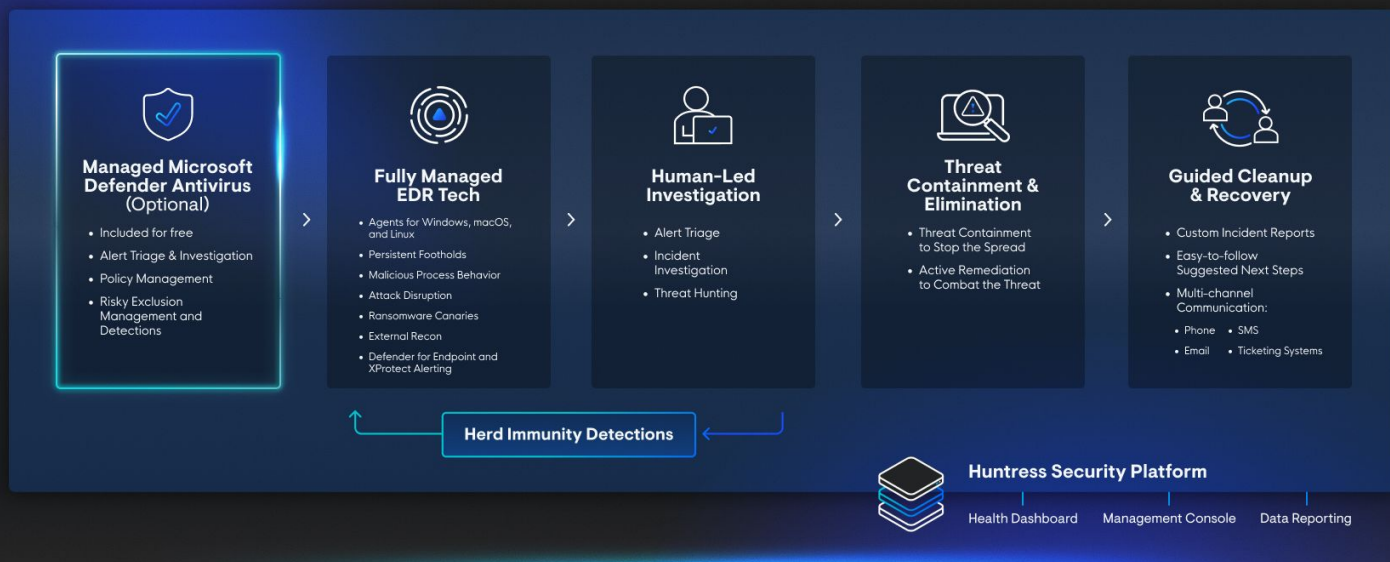

Less Worry, Less Stress

Our 24/7 global AI-assisted SOC and threat hunters have your back, hunting, monitoring, and responding to threats around the clock with an industry-leading **8 minute MTTR**.

Wreck Hackers, Not Your Budget

Get more from your budget *and* enterprise-grade endpoint protection, like Managed Windows Defender Antivirus, included for free. Our straightforward, everything included pricing keeps things predictable – **no surprises**.

Huntress 24/7 AI-Assisted SOC

Modern EDR with Complete Coverage, Affordable Pricing, and No Gotchas

	Purpose-built, Not Bolted Together	24/7 Protection	Only the Threats That Matter	Rapid Disruption, Containment & Response	Simple Pricing & Packaging
Huntress	 <p>Combines enterprise-grade endpoint technology with our team of experts managing everything for you. Hackers don't rest, and neither do we.</p>	 <p>Watches your back 24/7 with our global AI-assisted SOC of expert threat analysts, responders, and hunters who cut through the noise and focus on the threats that matter.</p>	 <p>You're alerted about the most critical threats, not flooded with noise. Our team of threat experts ensures we alert on high-accuracy incidents with very minimal false positives.</p>	 <p>Attack Disruption to slow active attacks, rapid containment to minimize impact, active remediation to evict hackers, and guidance to bolster resilience against future attacks.</p>	 <p>Straightforward pricing includes the tech and fully-managed service, providing maximum value for your investment. We ensure you have everything you need – no extra add-ons or service tiers required.</p>
Other Vendors	 <p>Tech that's built for enterprises with big budgets to afford the tools <i>and</i> the experts, or buy bolt-on services at added cost.</p>	 <p>Varying degrees of SOC maturity and coverage, ranging from alert forwarding services with automated threat hunting approaches to hyper-automated SOC's with low human involvement.</p>	 <p>Drowns you in a sea of alerts with little context, diverting focus from other priorities and, crucially, from the threats that truly demand attention.</p>	 <p>Gives hackers extra time to meet their objectives, placing the burden on your team to track down and stop threats that operate with speed and precision.</p>	 <p>Sells you low-value services packages and then slaps on pricey add-ons—only to have you realize what's missing when it's already too late.</p>
